Lisico, NE 69148

RE: Water Year 2020 Ground Water Use and Water Years 2021-2024 Available Water Report for a Certified Irrigated Tract

For your convenience, the enclosed form(s) show the Water Year 2020 ground water use and the available water for the next allocation period on the certified irrigated tract identified by the certification number, legal description(s) and, if applicable, the field name of that certification. The certification number has been assigned to that tract by the North Platte NRD for administrative purposes. The field name is the name for that tract that you have provided to the District.

Please note that the landowner(s) of any certified irrigated tract must notify the North Platte NRD within 60 days of (1) a change in ownership of a certified irrigated tract or portion of a tract, or (2) the enrollment of a certified irrigated tract or portion of a tract in a program (e.g., EQIP) requiring the cessation of irrigation, or be subject to penalties.

The allocation period began October 1, 2019 and ends on September 30, 2024.

You will be receiving additional Water Year 2020 water use reports if you have other certifications, designated allocation units and/or pre-existing allocation units.

If you have a flow meter that has failed to record the total amount of water pumped, someone from the District will be contacting you in the near future to obtain the information necessary to calculate your Water Year 2020 water use. You will receive a Water Year 2020 water use report when the calculation is completed.

Visit our website at <http://www.nprd.org> to find information on how to read flow meters (with and without telemetry units), calculate ground water use from the meter reading, and for the full text of the North Platte NRD Rules and Regulations for the Enforcement of the Nebraska Ground Water Management and Protection Act.

If you would prefer to receive this report electronically in the future, or if any of the owner or tract information shown in this report is incorrect, or if you have any questions regarding the information contained in the report, please contact the NRD office at (308) 632-2749.
